Subtle but significant refinements elevate the user's experience. Adjust sound, brightness, and other settings with a single touch. Hear all the music.

The HP ENVY 14 delivers the best audio experience through external speakers and headphones available on a PC. Beats Audio™, backed by HP-engineered sound technology, lets you experience music the way the artist intended you to by delivering it in its original form without the distortions and dropped notes typical in digital playback. It offers crystal-clear sound with deep controlled bass that can be accessed with a single keystroke: [fn]+b. Its powerful audio profile is tuned by HP specifically for the ENVY's exceptional audio components and tested by Interscope Records' artists, including Dr. Dre and Will.i.am. Available exclusively from HP.

Rely on HP to bring you a notebook this tough.

The U.S. Air Force relies on HP to support its cyber warfare strategy and as its preferred technology vendor to run critical operations. The Navy, to keep its defense network secure. Understandably so: HP notebooks are engineered to meet select US Department of Defense standards for equipment used in combat to help ensure they survive in extreme conditions for high temperature, humidity, shock and vibration.⁽⁵⁰⁾ Our notebooks must survive extreme temperatures while running—a full 6 degrees hotter than the hottest day recorded in Death Valley, CA, to date.⁽⁵¹⁾ Before releasing this HP 2000 model for consumer use, we put it through a minimum of 140 tests, consuming at least 95,000 hours—all to help ensure it can outlast the rigors of daily life.
