Updating your Nokia N900 to the latest software

Option #1

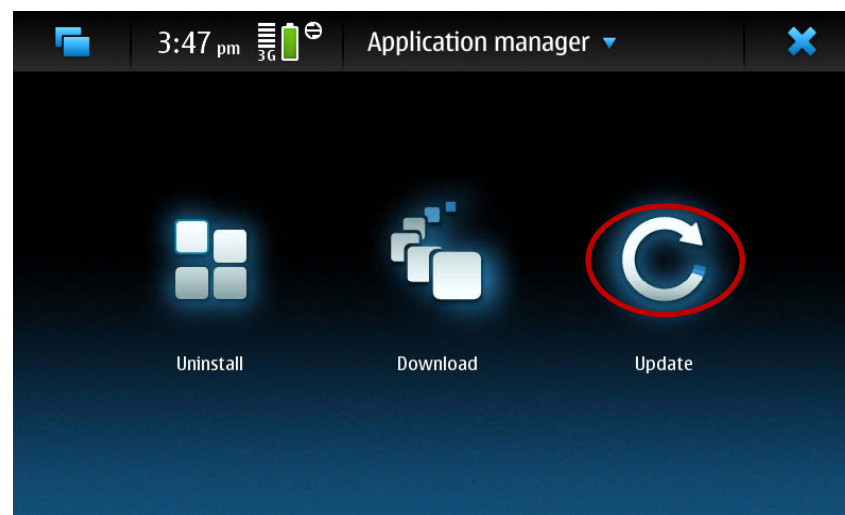

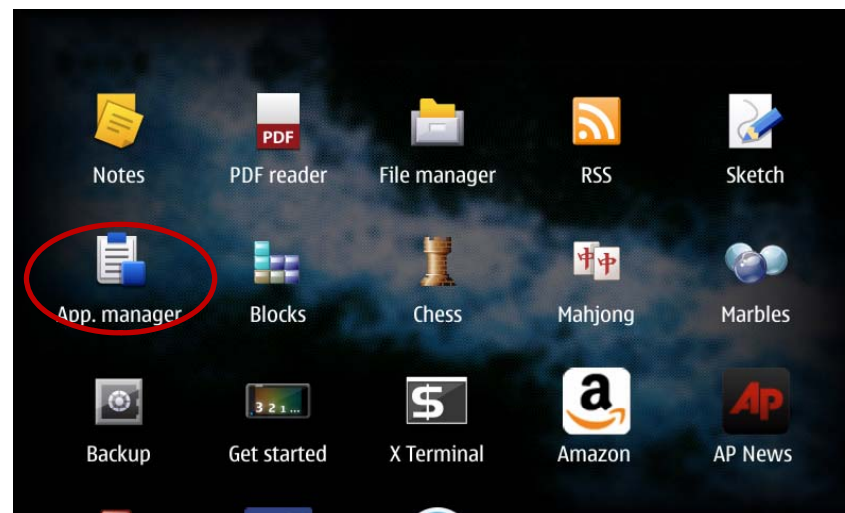

- When using Option #1 you may need to follow the process multiple times to bring your device completely up to date.
- With the device powered on and an available connection to the Internet press the menu key and select *More...*

Updating your Nokia N900 to the latest software

Option #1

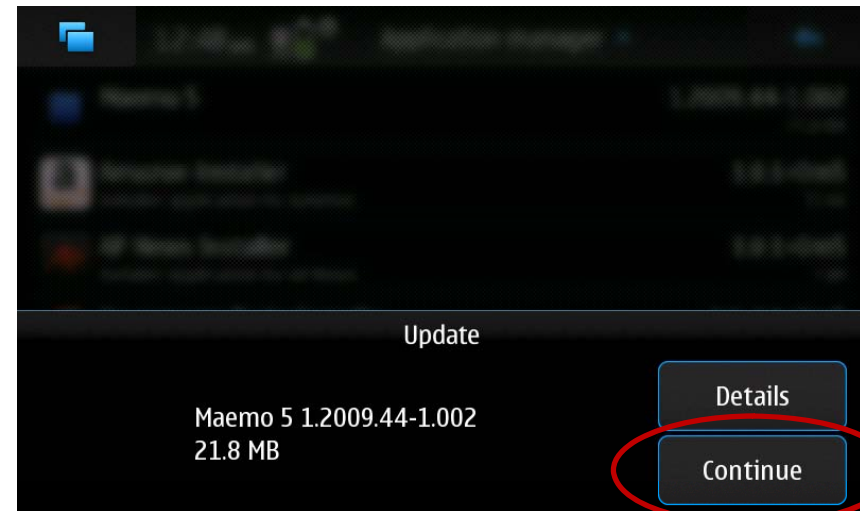

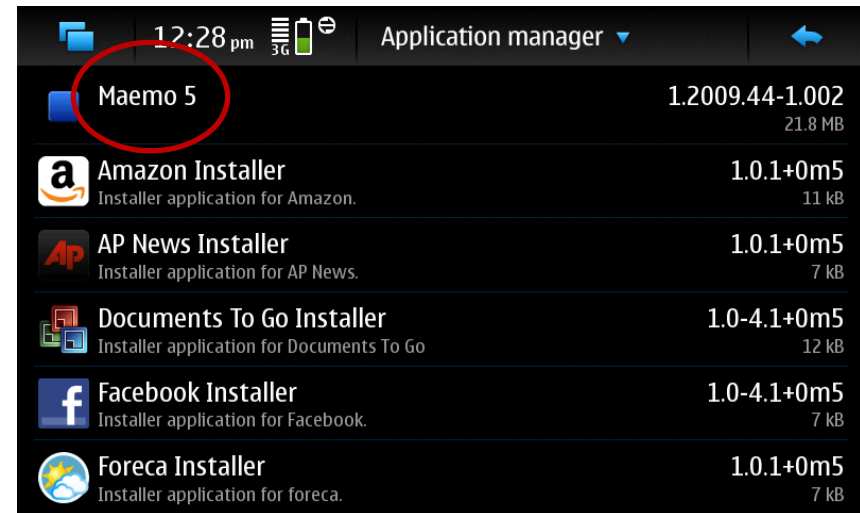

- Next select *App. Manager*
- Then tap *Update*. Choose your desired connection method. Selecting automatic connection will save you from selecting your connection each time.

Updating your Nokia N900 to the latest software

Option #1

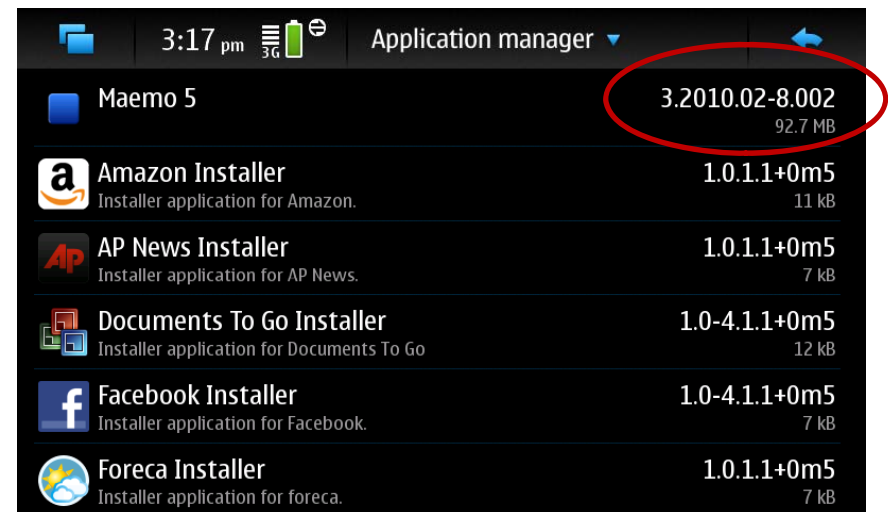

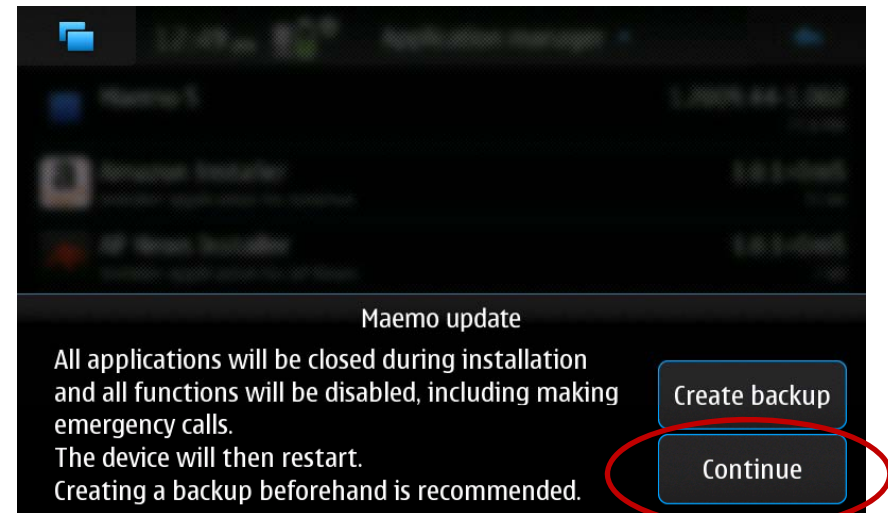

- Device software updates are listed as *Maemo 5*. The device will download the update details and ask you to *Continue*.

Updating your Nokia N900 to the latest software

Option #1

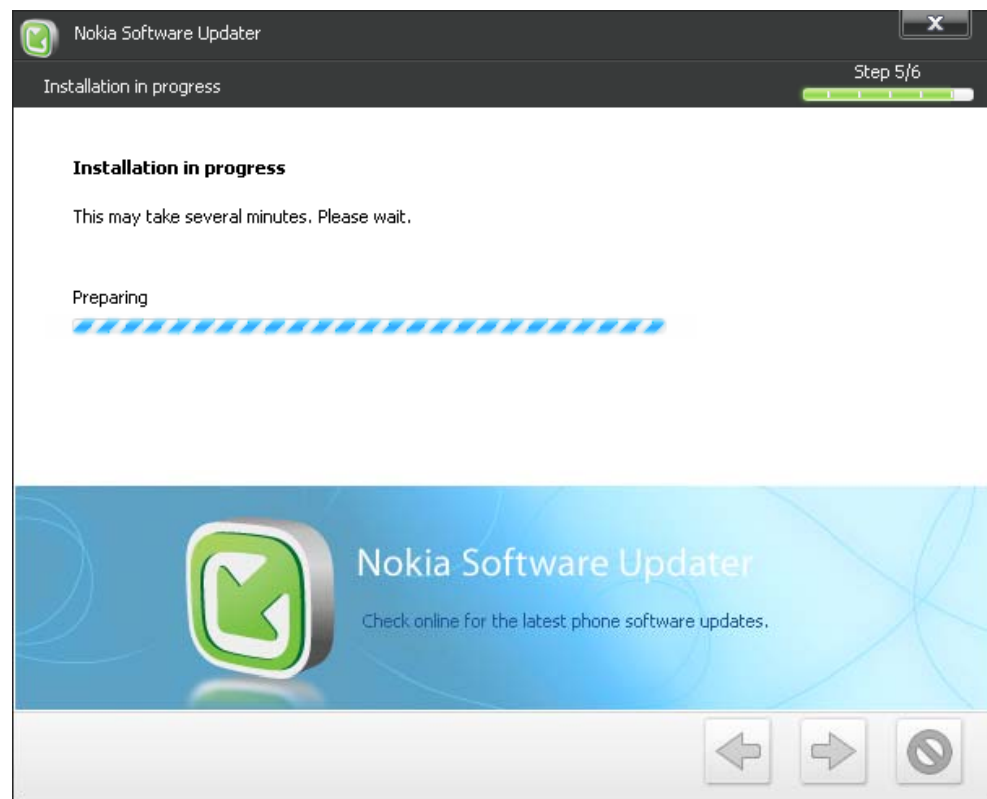

- If you have used your device already and have data you may not want to lose choose *Create Backup*, otherwise select *Continue*.
- The device will reboot. Follow the process again to ensure that you do not need any additional updates

Updating your Nokia N900 to the latest software

Option #2

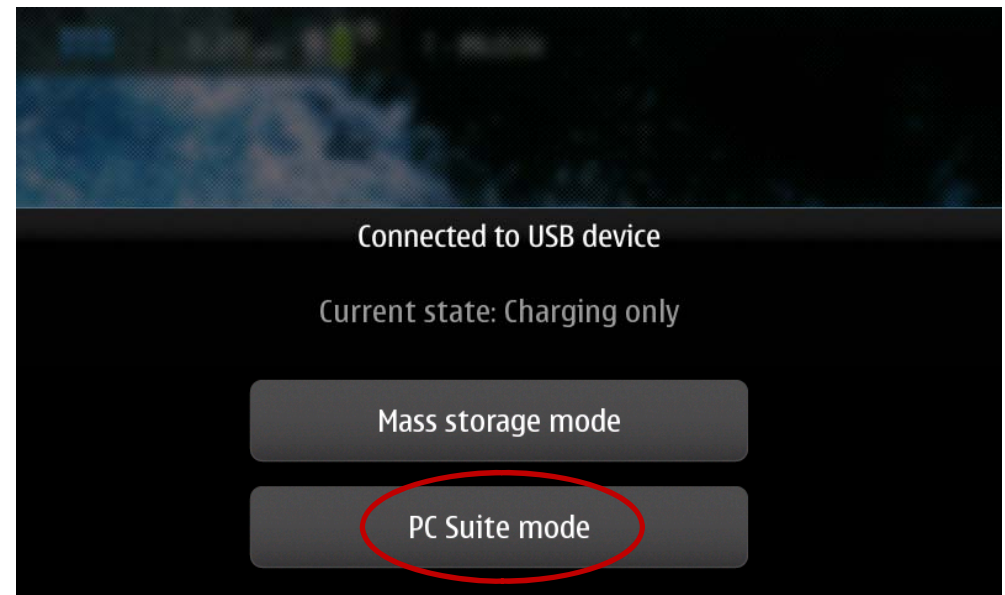

- Download and install Nokia Software Updater from www.NokiaUSA.com.
- Click on Support and Software > Download Software and click on

Updating your Nokia N900 to the latest software

Option #2

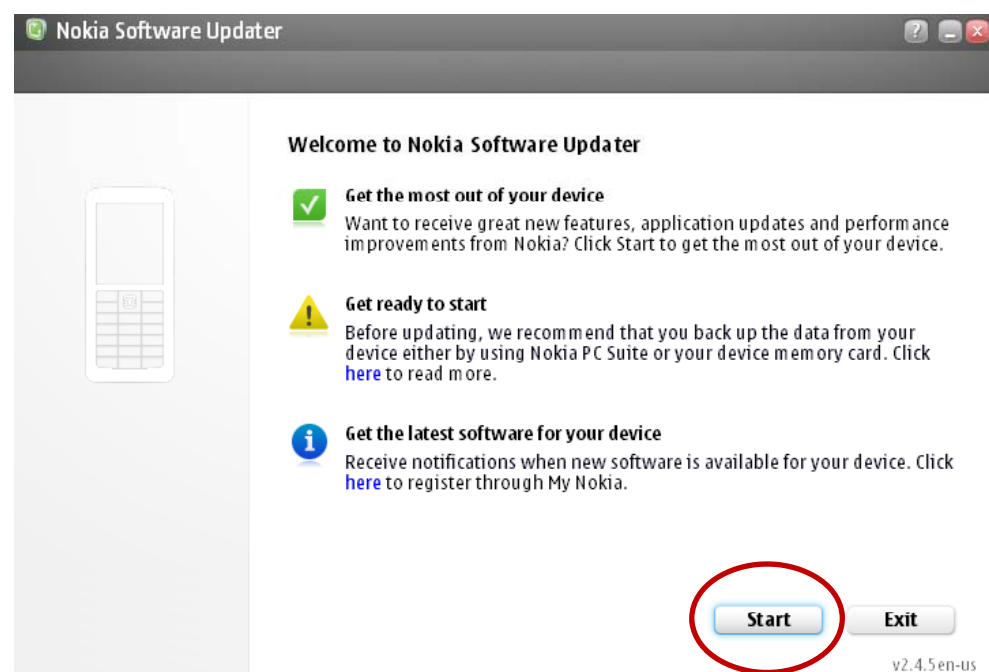

- Connect your Nokia N900 to the USB cable provided in your package and select PC Suite Mode

Updating your Nokia N900 to the latest software

Option #2

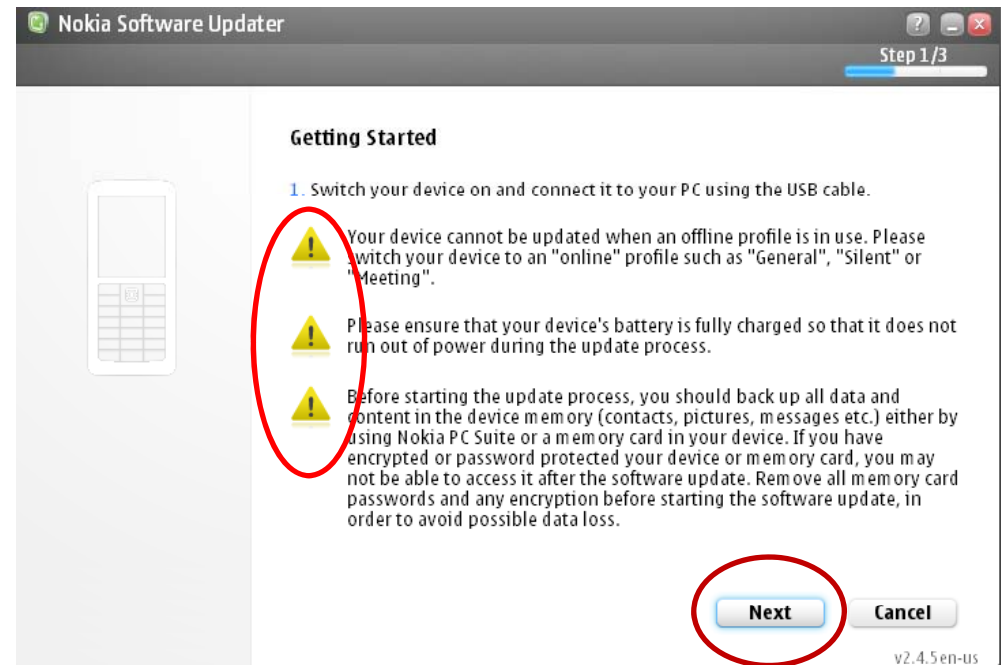

- Open Nokia Software Updater and allow the software to check for new updates. When using this method you are automatically updated to the latest version.

Updating your Nokia N900 to the latest software

Option #2

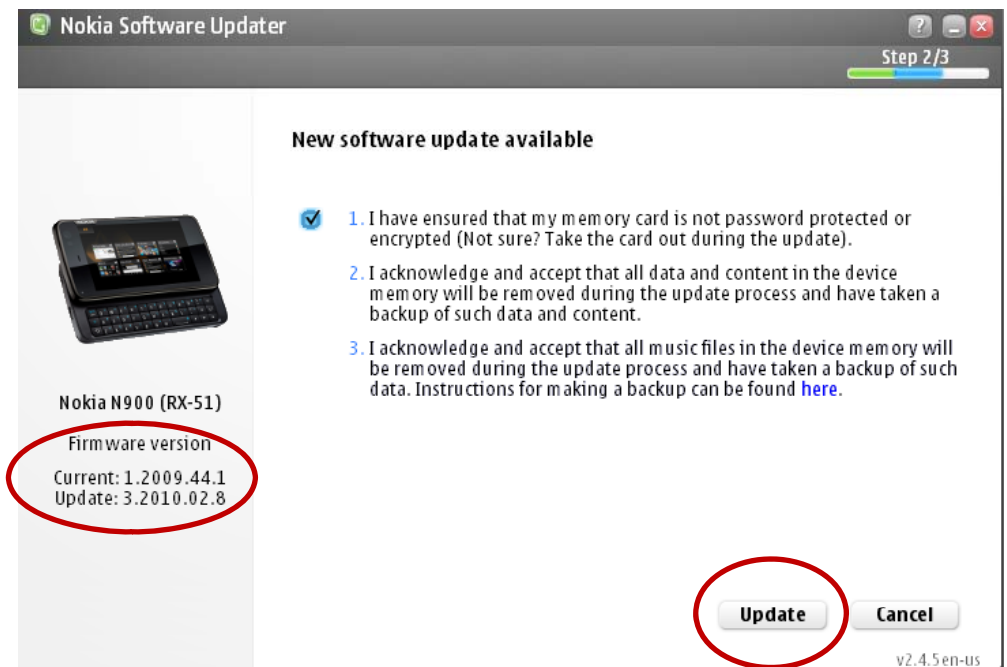

- Please read all warnings. You may need to charge your device before you update the software. If you have any questions concerning the update process, please contact Nokia Customer Care before proceeding at 888-Nokia-2U (665-4228)

Updating your Nokia N900 to the latest software

Option #2

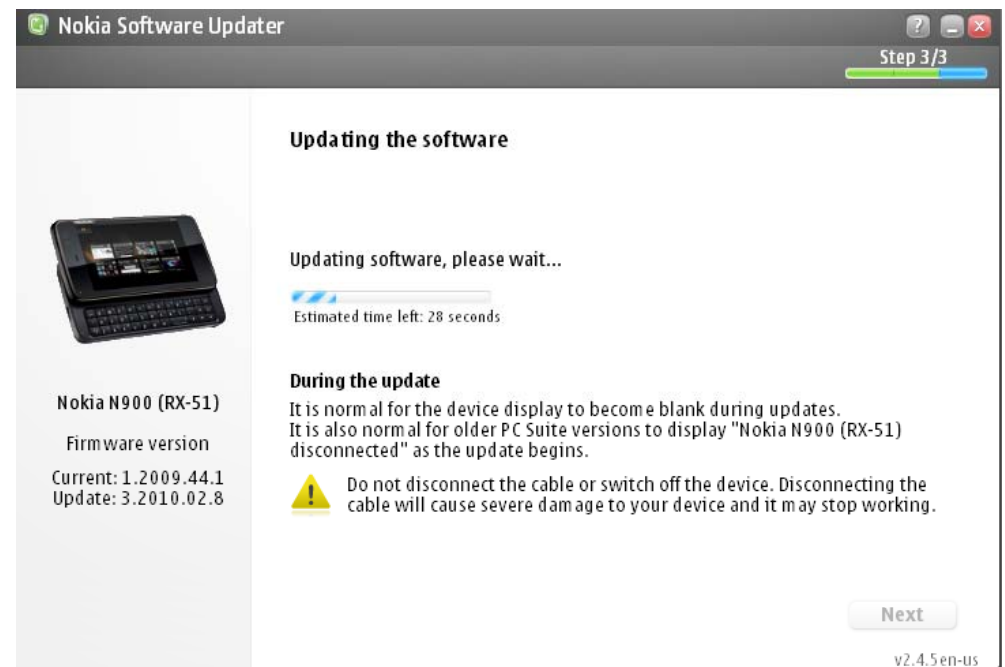

- Read and accept the user agreement. Settings and user data may be erased during the software update. Instructions for backing up settings and user data can be found in the link provided by Nokia Software Updater or by calling Nokia Customer Care.

Updating your Nokia N900 to the latest software

Option #2

- During the update it is important that you not disconnect the device from the USB cable or attempt to power the device on or off. Doing so may damage the device and it may stop working, causing the need for repair.

Updating your Nokia N900 to the latest software

Option #2

- When the software update is complete click Exit and you may now disconnect your device. If you created a backup during the updating process you may now restore the data from backup.

Frequently asked questions concerning device updates

- Q – What do I do if there are issues with either update process?
- A – Contact Nokia Customer Care 1-888-Nokia-2U (665-4228) if you experience any issues with the update process.
- Q – Why do I need software updates?
- A – Nokia frequently releases software updates to add new functionality, correct functionality and improve reliability.
